■ Open Access Aetna Select<sup>SM</sup> plans

\*National PPO network plans offered in Arizona.

\*\*Actual results may vary. Savings may be less when compared to other value-based or narrow network plans.

90.03.032.1 (2/17)

**aetna**<sup>®</sup>

**Aetna Funding Advantage** offers a range of provider network options — so employers may balance costs and the quality care their employees deserve. Employers can offer up to four different benefits/network combinations — giving employees the powerful option of choice.

## Broad national network plans

Our national Aetna Choice POS II\* network plans offer the widest network coverage available. Employees and dependents may go directly to health care professionals and facilities in or out of the network — without referrals.

## Fifty-one local-focused network plan options — quality care, lower-cost options

In addition to our broad national network plans, Aetna Funding Advantage offers 51 local-focused provider network plan options. **These plan options offer from 8 percent to 15 percent savings compared to Aetna broad network plans.\*\***

Our performance networks include doctors and hospitals that have met high quality and efficiency standards. And our value-based networks provide enhanced care management and coordination.

## Easy-to-use online tools

Finding and choosing network doctors and hospitals are key. So is being able to compare costs. Our online tools make that possible. To find a doctor or check costs, employees just need to log in to their secure member website.
