

Health Advocate is Now Offering Biometric Screenings

Health Advocate Wellness Update

We are pleased to announce that Health Advocate has acquired WellCall™, a national wellness coaching and biometric screening company located in San Francisco, CA. WellCall programs are designed around their unique and effective health coaching and national on-site health screenings. Health Advocate can now offer a wide variety of onsite programs that bring health-enhancing education, services, and coaching to your clients. Currently, Health Advocate is offering these services to companies with 500 or more employees.

Biometric Screenings

Objective measurements make it easier to pinpoint trouble areas and track progress. Our professional, licensed, and courteous staff can provide:

- 15 different screenings, including BMI, cholesterol, HbA1c, bone density, and more
- Immediate results with onsite review and education
- Tip sheets and information resources
- Online scheduler at no additional fee
- Individual and aggregate reporting
- Optional upload of results into a Health Risk Assessment (HRA) for accurate tracking
- Available nationwide

Screening Add-ons

Streamlined data from each of the following three solutions can be seamlessly integrated into one aggregate report for your clients.

- **Physician forms:** Employees can have their doctors submit physician forms.
- **Home test kits:** Kits can be mailed to employees who either miss the screening event or work remotely. These self-administered kits are sent to a lab for processing. They can be offered in a fasting or non-fasting version.
- **Lab visits:** Employees may have blood drawn for fasting tests that are offered through our lab network program. Blood pressure, height, and weight measurements are also available.

Immunizations *Onsite convenience*

Your clients and their employees will appreciate and value the convenience of onsite immunizations. Health Advocate can provide seasonal vaccines for influenza, pneumonia, hepatitis B, tetanus immunizations, and TB testing.

Health Advocate can provide these services for any client or prospect with 500 or more employees.

Please contact your Brown & Brown account manager to get pricing for quotes or information about these services.
